To whom it may concern,

Eliran has worked under my supervision during his internship at HyLife™ Foods for four months (May – Aug 2019). He has demonstrated knowledge of engineering principles in drafting various operational equipment from scratch and modifying pre-existing equipment.

During his tenure at HyLife™ Foods, he has gained experience with drafting cost effective designs that follow national and international codes and standards. He has also learned how to implement Lean Manufacturing principals, while using Six Sigma techniques. He conducted many Cycle/Takt time studies, and he wrote several SOPs for operational excellence, and automation fluidity.

Eliran has excellent interpersonal skills and can work in coordination with the Mechanical/Industrial Engineers, Admin Staff/Planners and Trades Personnel to execute projects smoothly. His unique style of relationship building enables him to get to root cause of the problem rather than surface level symptoms.

I would recommend Eliran for a job in any organization and I am confident that he would prove to be a good addition to your team.

Sincerely,

A handwritten signature in black ink, appearing to read "Sivadoss", written over a horizontal line.

Sivadoss Gangadharan,
Manufacturing Engineer Manager,
